

# Solutions for Community-Based Organizations

Organizations like United Way, libraries, disaster relief organizations, medical associations, and other nonprofits often serve as the foundation of support for their communities whether local, regional, or national. They provide the programs and resources directly to the people in need. We make it easy for organizations to connect people to social care services and follow up quickly.

- Use our tools to streamline care management and client intake while increasing your impact.
- Ensure that your clients are receiving the help they need, from both within and outside of your organization's programming.
- Evaluate the needs in your community to expand or adapt your strategic programming.
- Submit claims and get paid for services provided.

Every organization's needs are different, and we partner closely with you to design and implement a solution for your goals.

## Who would use Findhelp at your organization?

Use the Findhelp platform to connect the people seeking services to both your internal programs and community resources that address their immediate needs. Your program staff can use our robust case management tools to coordinate intake, respond to incoming referrals, and track services and interventions provided.

## How does Findhelp uniquely support community organizations?

- Create efficiencies by integrating Findhelp with your system of record.
- Power your network with referral tracking, data, and automated billing capabilities.
- Use data to enhance your strategy and support funding opportunities.

## How do current community organization customers find success with Findhelp?

- Lifting up patrons: how we partner with libraries.
- Welcome home: helping immigrant and refugee families thrive.
- Enhancing social care coordination: how Findhelp partners with 211 & United Way.

## Which nonprofit leaders already work with Findhelp?
