How to add a search box to your website using Wix

1) Click “Add” on the left edit panel of your page

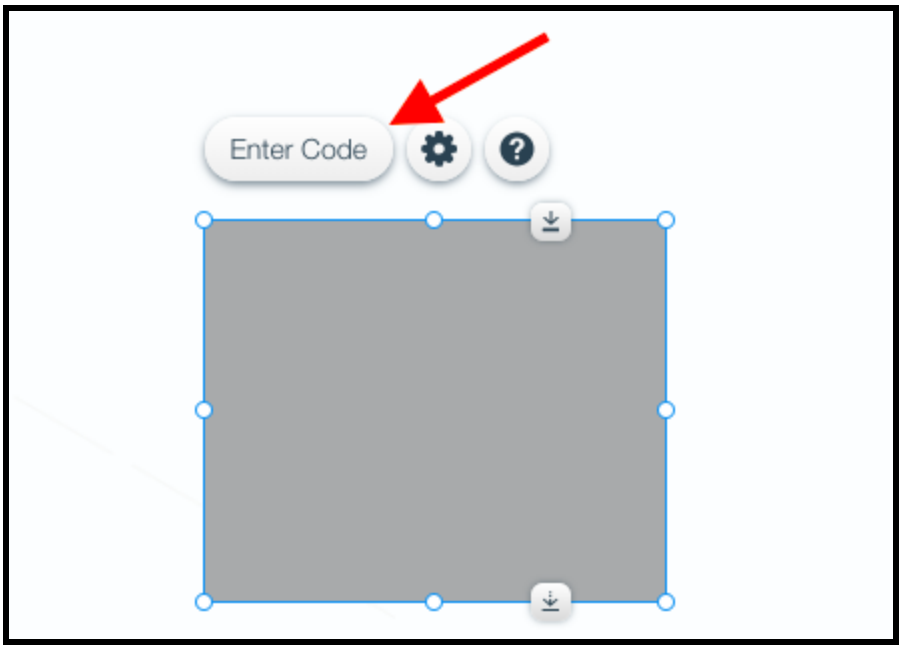

2) Choose “More” from the menu

Then, choose to add a “HTML/IFrame”.

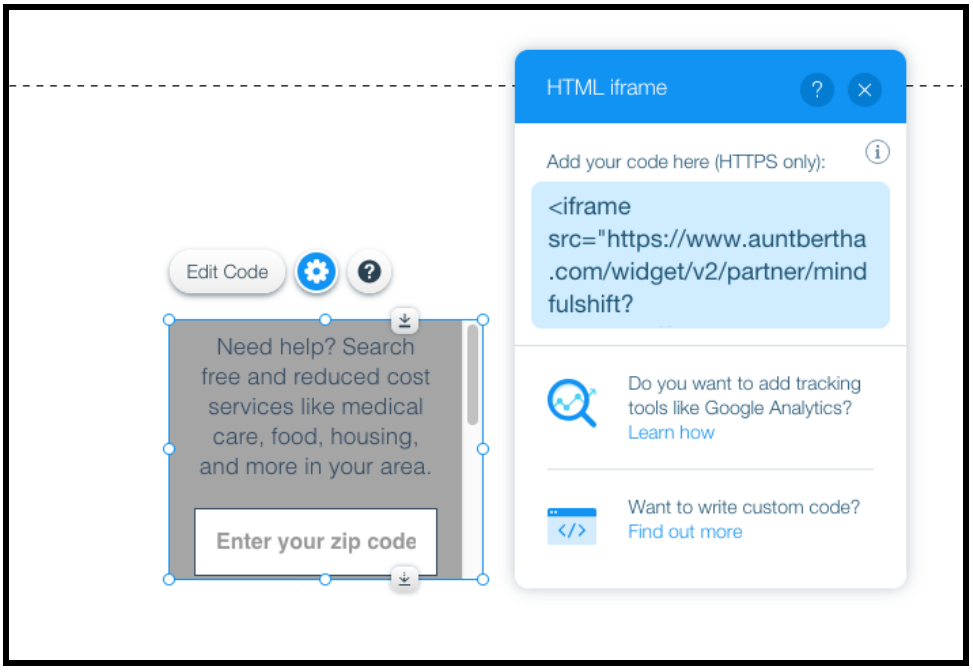

3) In the box that appears, click the “Enter Code” button

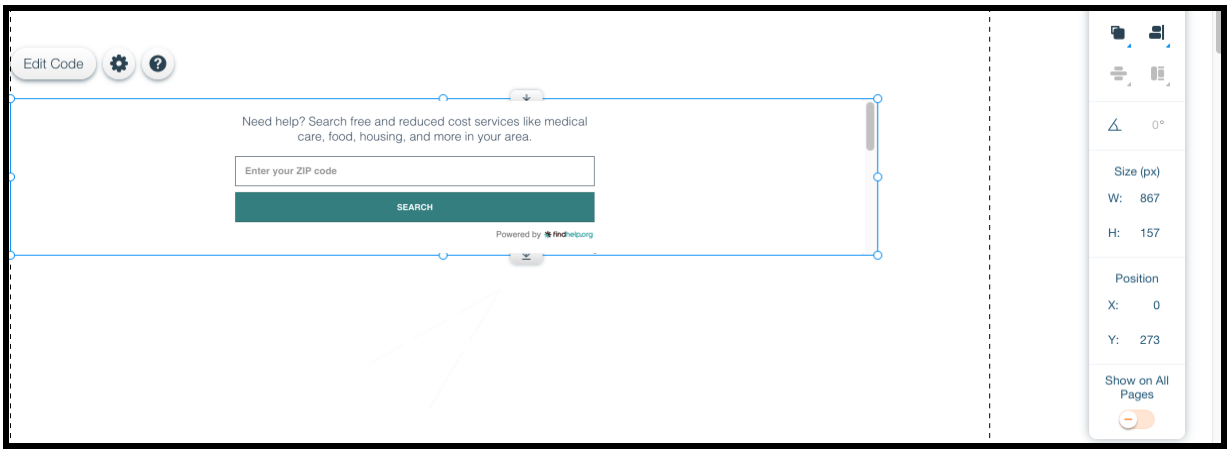

4) Copy and paste the entire code you received from our team

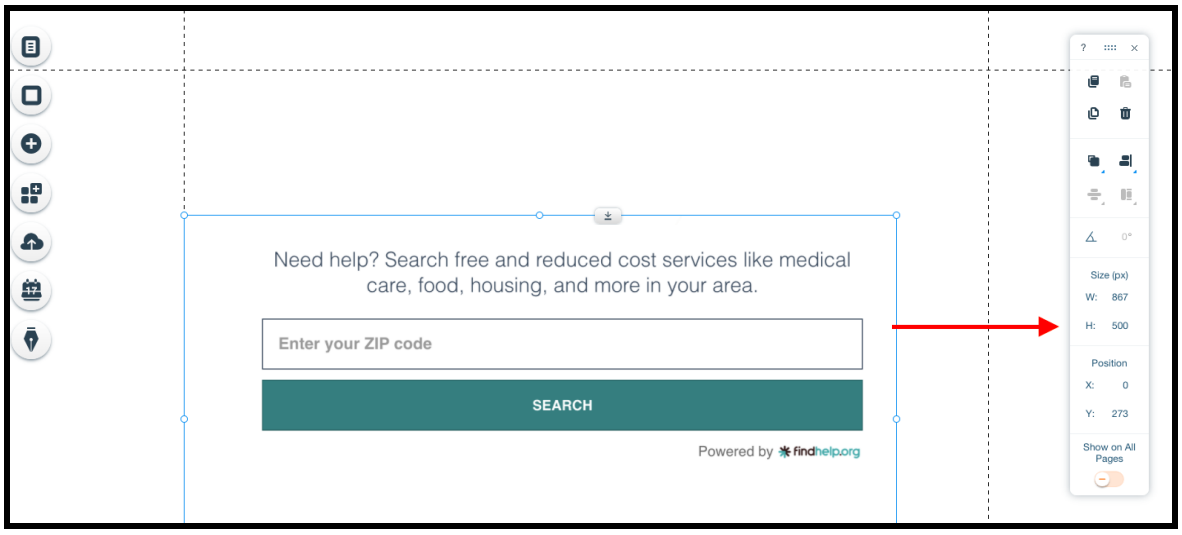

You’ll see the Search Box appear on the left.

5) Adjust the size of the Search Box by using the drag buttons in the corners.

6) Remove the scroll bar by adjusting the height in the tool bar on the right to 500 or more.

7) Click “Publish” and you’re done!
